

LED STREET LIGHTS

# PRODUCT CATALOG

## **Overview**

The ZGSM<sup>®</sup> H-Series LED street lights are using PHILIPS LUMILEDS<sup>®</sup> luminous source, providing excellent lumen output, long-lasting stability and splendid sight.

The ZGSM H-Series LED street lights have a high luminous efficiency and better service life. Provide 7 years warranty on luminaire.

## **Color Options**

## HIGH-EFFICACY LED LIGHT SOURCE

Philips Lumileds Luxeon TX Greater than 135lm/W high efficacy, illumination grade LED light source.

Philips Lumileds 3030 2D Greater than 150lm/W high efficacy, illumination grade LED light source.

Philips Lumileds 5050 Greater than 185lm/W high efficacy, illumination grade LED light source.

## HIGH-END LED DRIVER (Two options)

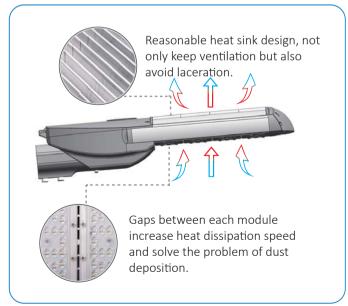

High-end Mean Well HLG Series LED driver, optimal stability, performance and lifespan.

#### + DIMMABLE

High-end Inventronics programmable LED driver, integrate dimming function and 6KV /10KV surge protection. Provide excellent performance and lifespan.

# AIR CONVECTION EFFECT

## FLEXIBLE COMBINATIONS OF MODULES

#### ★ Design Features

Professional lens design, suitable for various applications.

Use German Mago connectors for internal wiring, safe, convenient & fast.

Luminaire body is fixed by two M8x16 fortified stainless steel screws.

Innovative pluggable connector, clean & efficient.

Rational clamshell design for wiring compartment, sturdy and durable.

Neat inner cavity structure, ensure the thermal convection of LED driver.

Use stainless steel screws for whole luminaire, no corrosion worries.

Full aluminum made, sufficient heat dissipation area.

## **Multiple Light Distribution Options**

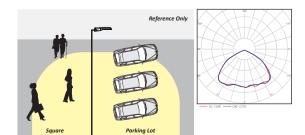

Street light should fit with a wide range of applications, such as highway, express way, roadway, avenue, walking path or parking lot lightings. Considering this, ZGSM provides different light distribution lens for the H Series street light to achieve best lighting effect in different applications. ZGSM follows the North American IESNA standard in providing the optional lens width ,TypeI, Type II ,Type II and Type V. Type I is suitable for walking path with 1 lane, Type II is for 2 lanes and Type III is for even more wider road, Type V is for parking lot. ZGSM selects the most suitable lens for its customers according to the detailed parameters project by project.

# Reference Only

#### TYPE I

The Type I lens of ZGSM H series street light has beam angle of 50\*160 degrees. In the IESNA Standard, The Type I distribution is great for lighting walkways, paths and sidewalks. It is generally applicable to where the mounting height is approximately equal to the roadway width.

#### TYPE II

The Type II lens of ZGSM H series street light has beam angle of 65\*155 degrees. In the IESNA Standard, the Type II distribution is used for wide walkways, on ramps and entrance roadways, as well as other long, narrow lighting. It is generally applicable to where the width of the roadway does not exceed 1.75 times the designed mounting height.

#### **TYPEII BLS**

The Type II BLS is a new light distribution developed based on Type II. BLS means back light shield. The light on the back of pole be reduced and the light in front of the pole be increased accordingly. It is generally applicable to where no need or need less light on the back of pole, such as residential area, high way, bridge and etc.

#### **TYPE III**

The Type III lens of ZGSM H series street light has beam angle of 80\*160 degrees. In the IESNA Standard, the Type III distribution is meant for roadway lighting, general parking areas and other areas where a larger area of lighting is required. This distribution is intended for luminaires mounted at or near the side of medium width roadways or areas, where the width of the roadway or area does not exceed 2.75 times the mounting height.

#### TYPE V

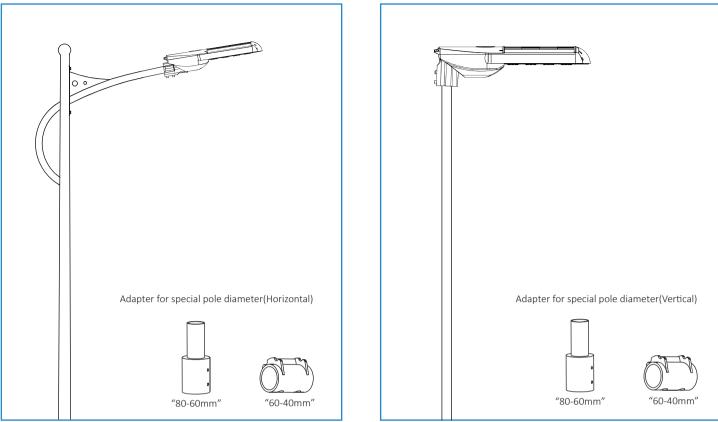

The Type V lens of ZGSM H series street light has beam angle of 110\*110 degrees. In the IESNA Standard, It is intended for luminaire mounting at or near center of roadways, center islands of parkway, and intersections. It is also meant for large, commercial parking lot lighting as well as areas where sufficient, evenly distributed light is necessary.

#### Customized service

Due to each city has its own sunshine condition, and customers have different working hours and rainy days on request.

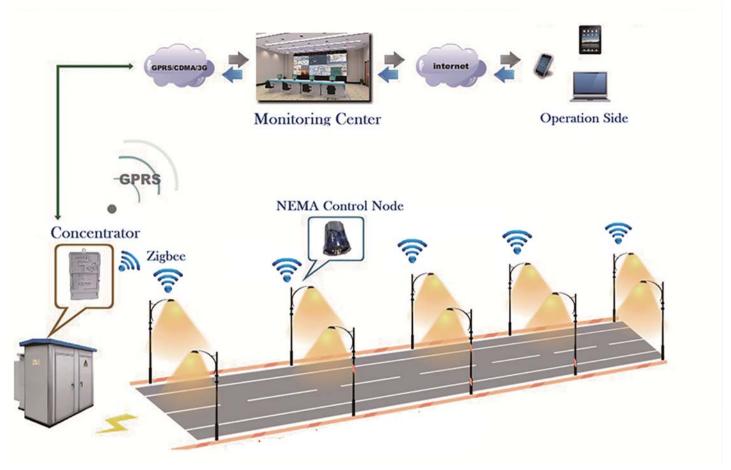

If you want to know more exact configuration, please contact us for below questions:

- 1. What is the geographical location your solar LED street lighting system will be installed?
- 2. How many hours per night the LED street light works?
- 3. How many days to backup in case of continuous rainy days?
- 4. Do you need dimming the LED street light (during the off-peak hours)?
- 5. Do you have any other requirements?

# **Intelligence Street Lighting System**

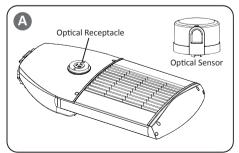

ZGSM provides a total solution for intelligence street lighting system.

ZGSM street light intelligence system is made up by software, concentrator, terminal controller. The concentrator controller is installed in the distribution cabinet, the terminal controller is installed in the lighting terminal. It proceeds with communication via GPRS/CDMA/WCDMA wireless network or cable network & monitor center and proceeds with communication via ZIGBEE/PLC. Concentrator controller can control each terminal controller via receiving, executing, forwarding PC management software, which can control each lamp's switching on /off or dimming ,then save electric energy. It can also monitor the lamps' electric energy to achieve failure lamps function. Concentrator controller can built-in DO to achieve street light loop control, it can connect with other equipment to collect local illumination, temperature and other information, feedback to PC management software and achieve to monitor the current information.

## **Optical Control**

Optical control function is supported by optional

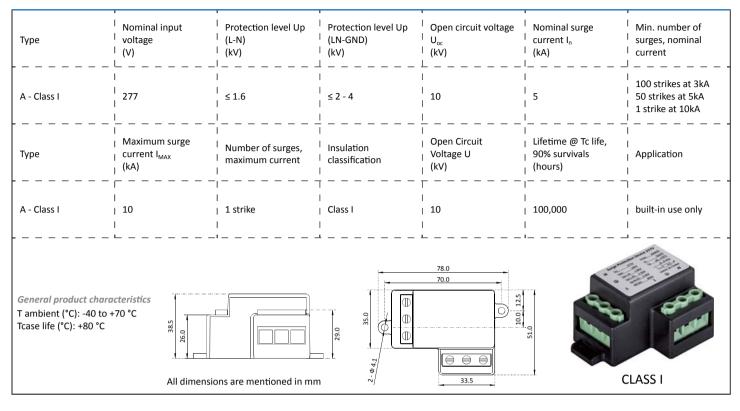

If the fixture with OPTICAL CONTROL function, the Optical Receptacle will be installed on the cover of fixture. See (). Fit the pins of Optical Sensor to Optical Receptacle, firmly insert and rotate Optical Sensor to proper position.

Optical Sensor

# **Surge Protection Device**

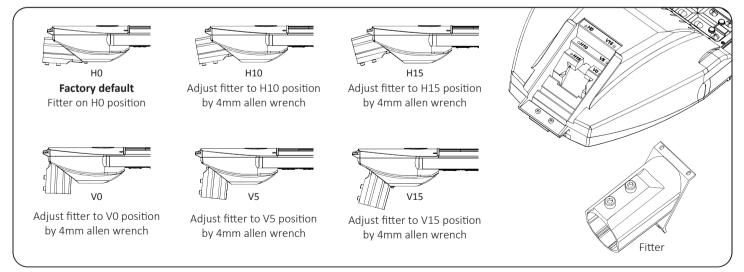

## **Dimming Optional**

Inventronics driver will be used if dimming request.

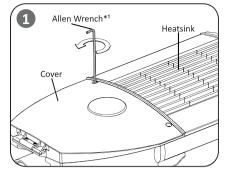

Multiple dimming functions are integrated (0-5V DC or 0-10V DC or PWM Signal or Timer).

- ★ 0-5V Dimming [ All the models over 50W are available ]
- ★ 0(1)-10V Dimming [ All the models are available ]
- $\star$  PWM Dimming [ All the models over 50W are available ]
- $\star$  Timer Dimming [ All the models over 50W are available ]

# **Flexible Fitter**

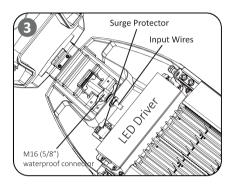

# Installation

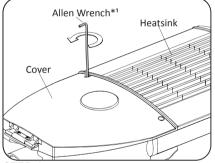

\*1 Allen Wrench: 4mm (5/32")

\*1 Inner Hexagon Screw: M5 (3/16")

## Maintenance

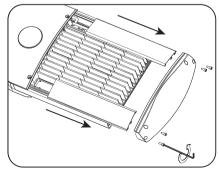

★ Driver replacement

#### STEP 1:

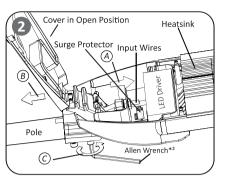

To open cover, hold fixture by heatsink with the light modules **facing down**. Remove 2 screws on the cover by 4mm (5/32") allen wrench.

#### ★ Module replacement

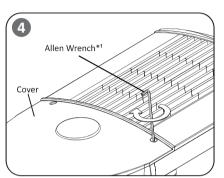

#### STEP 1:

Unscrew the four M5x12 screws by 4mm (5/32") allen wrench and pull out the lamp head. then Pull out the cover both sides by hand.

\*2 Allen Wrench: 6mm (7/32")
\*2 Inner Hexagon Screw: M8 (5/16")

## STEP 1:

To open cover, hold fixture by heatsink with the light modules **facing down**. Remove 2 screws on the cover by 4mm (5/32") allen wrench.

## STEP 2:

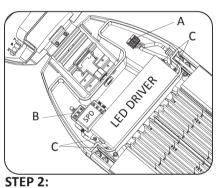

Keep the cover in open position, lead the **Input Wires** in through the M16 (5/8") water-proof connector **(see @)**, Do not tighten. Slide fixture onto pole **(see @)** and adjust to level position. Once desired position is achieved, tighten (2) mounting bolts **(see @)**.Recommended torque: 17Nm ± 1Nm.

## STEP 3:

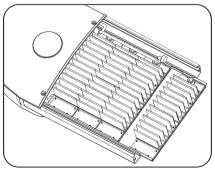

Connect the **Input Wires** into **Terminal Block**, Reference "**Electrical Connections**" section for completing electrical connections.

## STEP 4:

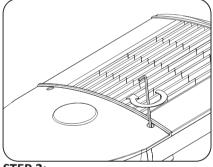

Close the cover, tighten (2) mounting bolts.

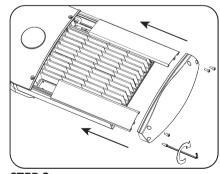

Keep the cover in open position, unscrew the four M4X8 screws(see) and pull out the input of driver from surge protector device(see) by cross screwdriver, disconnect the driver from the WAGO connect(see), take off the failed driver and replace by a new one.

**STEP 2:** Disconnect the failed module from connector and replace a new one.

**STEP 3:** Connect and tighten up each part back step by step. Maintenance finished.

**STEP 3:** Connect and tighten up each part back step by step. Maintenance finished.

# APPLICATIONS

- for Road, China

**SERIES-H** 

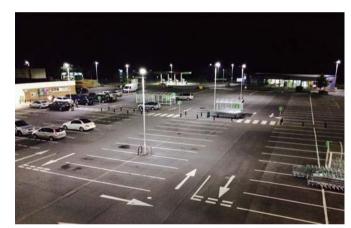

LED STREET LIGHTS

- for Squares, UAE

- with Solar Power, France

- for Parking Lots, United Kingdom

- for Outdoor Warehouses, Austria

- for Wall Mounting, Sweden

# APPLICATIONS

- for Amusement Park, Mexico

SERIES-H LED STREET LIGHTS

- for Road, China

- for Parking Lots, USA

- for Gas Station, Nigeria

- for Road, Iraq
